## Profile

---

A creative and diligent software development consultant with excellent problem solving and technical skills. Over 2 years of professional experience using modern technologies to create performant web applications delivering engaging user experiences.

## Experience

---

### Netcompany - Software Consultant

08/2019 – Present

- Part of the applications development team working on building and refining front end features and business logic for a large scale web application, using technologies such as C#, JavaScript, TypeScript, HTML, CSS and Azure Logic Apps.
- Owned the responsibility for ensuring the web application behaves responsively across different browsers and devices whilst also meeting WCAG 2 accessibility standards.
- Implemented security features that process £1000s worth of transactions on a daily basis.
- Working in agile sprints following iterative and test-driven development methodologies, having also been a team lead for a scrum team of 7 software developers.

### Royal Surrey County Hospital - Trainee Computer Scientist

09/2017 – 09/2018

- Created bespoke, in-house web applications for the Nuclear Medicine department, for which I was the sole developer.
- Worked closely with medical physicists to create numerous internal web applications from scratch using ExtJS, PHP and SQL that increased the overall efficiency of the department.
- Provided support, performance improvements and training for existing web applications.

## Education

---

### University of Surrey

09/2015 – 07/2019

#### BSc Computer Science (with year in industry)

- Graduated with a first class honours
- Completed an industrial placement year at the Royal Surrey County Hospital
- Strived to improve the student experience for others by chairing an intramural university society and volunteering as a listener for Surrey Nightline

### Bexley Grammar School

09/2013 – 07/2015

- Achieved grades AABBC at A Level
