## Profile

---

A creative and diligent frontend developer with excellent problem solving and technical skills. Over 3 years of professional experience using modern technologies to create performant web applications using JavaScript frameworks with a deep understanding of the React ecosystem.

## Experience

---

### Frontend Developer - Everledger

03/2021 – Present

- Building the frontend layer of a new mobile-first product to visualise provenance data from innovative blockchain and NFC technology using React and NextJS, working closely with the product owner, UX designers and QA engineers.
- Creating and maintaining components in the Storybook component library used across all Everledger products as well as working on microservices using NestJS when needed.

### Software Consultant - Netcompany

08/2019 – 03/2021

- Part of the applications development team working on building and refining front end features and business logic for a large scale web application, using technologies such as C#, JavaScript, TypeScript, HTML, CSS and Azure Logic Apps.
- Working in agile sprints following iterative and test-driven development methodologies, having also been a team lead for a scrum team of 7 software developers.

### Trainee Computer Scientist - Royal Surrey County Hospital

09/2017 – 09/2018

- Created bespoke, in-house web applications for the Nuclear Medicine department, for which I was the sole developer.
- Worked closely with medical physicists to create numerous internal web applications from scratch using ExtJS, PHP and SQL that increased the overall efficiency of the department.

## Education

---

### University of Surrey

09/2015 – 07/2019

#### BSc Computer Science (with year in industry)

- Graduated with a first class honours
- Completed an industrial placement year at the Royal Surrey County Hospital
- Strived to improve the student experience for others by chairing an intramural university society and volunteering as a listener for Surrey Nightline

### Bexley Grammar School

09/2013 – 07/2015

- Achieved grades AABBC at A Level

## Technical Skills

---

### Languages

JavaScript · TypeScript · HTML · CSS · C#

### Frameworks/Libraries

React · NextJS · Node · NestJS · Express · Sass · Jest

### Databases/Tools

SQL · MongoDB · Firebase · Git · Jira · Storybook · Heroku · AWS
